

INFRARED THERMOGRAPHY

2 DAY BASICS WORKSHOP

May 14 + 15 -- 8:30AM to 4:00PM

with Monroe Infrared Technology

Earn 7.5 BPI Continuing Education Units (CEU) in this 2 day hands-on course, which emphasizes practical knowledge learning, field training and includes a course exam.

Learn how to successfully operate the handheld infrared camera and efficiently incorporate it in businesses. The course gives new and experienced thermographers a solid understanding of infrared energy audit practices. Because the course is occurring at the Pittsburgh Green House, a typical 110-year old home and weatherization training center, the training will be mostly hands-on in real scenarios.

NOTE: This workshop is limited to 16 participants. Please register to reserve your spot.

COST:

\$550/person, \$1000/group of 2

LOCATED AT:

Pittsburgh Green House -- 308 North Sheridan Avenue -- Pittsburgh, PA 15206
