

ACCUTOOLS®

What gasket kit do I use for my TruBlu hose kit?

If you have:

Legacy adapters

The kit is SA10868

Find it here:

www.bit.ly/SA10868

"Hi Flow" adapters

The kit is SA10868-1A

Find it here:

www.bit.ly/SA10868-1A

Note the differences:

- 1. The legacy adapters are long and skinny. The Hi Flow adapters are short and squat.*
- 2. The flange (large flat part) of the legacy adapters is brazed onto the tube that hold the nut. The Hi Flow adapter flanges are monolithic with the tube (i.e one part).*
- 3. The knurling (diamond pattern) is different.*
