June 26, 2020

Dear valued customer

Asco would like to take this opportunity to inform all of our customers that the vast majority of the Asco torch line is made in the US.

Certain items are incredibly difficult to source within the US and we need to outsource them from around the globe.

Those items are

RS450 Nitro regulator

OAK 3TT OXY ACETY burn/braze kit

1619 replacement gauge for regulators

Y200 and Y300 Propane BBQ regulators

Furnace and melting pots and ladles

The rest of our line is MADE IN THE USA with pride. As we continue to strive to source more US products, we will update as available.

Thank you for your continued support of our torch line.

We value our customers and truly appreciate the fantastic business relationship we have developed and continue to grow.

Kindest regards

Bryon Hyer

Vice President

Asco Torch equipment
