

1502S SAFETY CONTROL SWITCH

FOR USE WITH METAL OR PLASTIC DRAIN PANS

Beckett's pan switch reliably detects water in the drain pan and shuts equipment down before overflow. The 1502S is easy to install with no tools required and features superior gripping metal bolts for drain pans as shallow as 1.5" deep.

INCLUDES:

- Superior clamp strength with galvanized
 - zinc-plated metal wing nut bolts
 - Protected float enclosure with test tab
 - Single pole, double throw, single break snap
 - action switch
- Low profile, single piece, no drill design
Safe for low voltage 24 VAC, 5 amp applications
Switch activates at 3/4" from condensate overflow
For commercial or residential applications
