- **UPGRADED** HOOK FOR VERTICAL HANGING
- **NEW** EASY-TO-SEE RED POPPER FUSE
- **NEW** FRONT FACING LEAD PORTS FOR A MORE COMPACT UNIT
- **NOW INCLUDES** 'L' SHAPED MAGNET TIPS

YOUR FAVORITE MULTI-JUMPER, UPGRADED.

The Jumper King[®] is an HVAC diagnostic tool used to bypass low-voltage thermostat circuits so technicians can safely and quickly activate individual HVAC functions (cooling, heating, fan, reversing valve, etc.) during troubleshooting.

FEATURES

- Innovative selector switches to activate leads/circuits of your choosing at any time, without the need for a thermostat.
- Will never short out - contains a resettable popper fuse
- Rugged unit has a rubberized boot, a magnet and fold-out hook for convenient mounting
- Four types of interchangeable tips: spade adapters, alligator clamps, 'L' shape magnetic tips, and self-piercing insulation tips
- No batteries required - powered by the low voltage in the A/C unit
- Replaceable leads
- Works on multiple stage units including heat pumps
